ALTSD Prevention and Intervention Services and Support

RFP#23-62400-3000-01608

1. Is there a maximum amount or value a client can receive in both direct and indirect support? Could you please expand on allowable activities and ineligible expenses in each of the categories on pages 24-25?

The maximum value will be determined by the Agency on a case-by-case basis. We anticipate some of the construction/home modifications might be the higher cost activities and will assess this as needs are identified.

Allowable activities are those that can fall under the 5 service categories and is not an exhaustive list.

Ineligible expenses are those that are not directly related to the coordination and logistical support to secure the services or costs of goods.

2. What if alternative procurement options are used such as cooperative purchasing (13.1.135 NMSA 1978) or procurement under an existing contract (13.1.129 NMSA 1978) when it related to the costs of goods sold statement on page 25.

These will be allowed and can be used as an alternative option to acquire three independent quotes. Appropriate information must be shared with ALTSD when using the above mentioned procurement options and approval by ALTSD will still be required.
